## **DETAILED ACTION**

### ***Election/Restriction***

1. Election of species 1 without traverse in response dated 1/6/2009 is acknowledged. Election requirement is made final.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-2 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent<sup>1</sup> and recent Federal Circuit decisions<sup>2</sup> indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. For example independent claim 1 should recite after the preamble "using a computer/processor to perform the steps:.". Claim 2 is dependent on claim 1 therefore claim 2 is also rejected.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-2 are rejected under 35 USC 102 (e) as being anticipated Kim et al. (6,990, 151).

Regarding claim 1, Kim discloses establishing a concealment order of macroblocks in rectangular array having opposite sides (Fig 4, col. 10, lines 35-42 ) comprising:

concealing the macroblock having missing/ corrupted pixel values by progressing in a direction of the larger of the sides of the array (Fig. 4, col. 35-42, Kim shows concealing macroblock having missing/ corrupted pixel values by progressing in a direction of the larger of the sides of the array).

Regarding claim 2, Kim discloses progressively concealing in opposite direction of one of the larger sides of the array until reaching a central portion of the array (Fig. 4, col. 35-42, Kim shows progressively concealing in opposite direction of one of the larger sides of the array until reaching a central portion of the array).
